

HPM[®] Rebar Anchor Bolt

Easy and fast bolted connections

- Standardized and approved rebar anchor bolt system.
- Approved design parameters.
- Quick deliveries directly from stock.
- Certified production.
- Wide range of products for all anchoring purposes.
- Accessories for quick and easy installation.
- Easy to design with free Peikko Designer[®] software.
- Declared performances by CE marking via ETA (HPM[®] L).

HPM[®] Rebar Anchor Bolts are used to anchor concrete or steel structures and machinery into concrete base structures. The anchors are embedded into concrete and the structures are fastened to bolts by nuts and washers. The joint between two structures is then grouted.

The system consists of a wide range of headed and straight anchor bolts, installation accessories, and tools for designers. Headed bolts are used typically in shallow structures for end anchoring, whereas straight bolts are used for lap splices. In addition to plain finish bolts, the products are also available as ECO or Hot-Dip galvanized. Installation templates are provided to ensure easy and correct installation of the anchor bolts.
