

TERAJOINT® Free Movement Joint

Robust Free Movement Joint System

- Prefabricated leave-in-place free movement joint system with a variety of integral load transfer mechanisms to suit all floor loadings.
- Heavy Duty performance with 40 mm x 10 mm cold drawn steel for extreme armoring of joint arrises.
- Suitable for the high flatness category floor and superflat floor construction.
- Fast track installation with a selection of fixing methods and accessories.
- All materials used in the construction of this product are 100% recyclable.

TERAJOINT® is the industry standard in the range of prefabricated heavy duty movement joint systems, suitable for all large area construction methods for ground bearing and pile supported concrete floors. The cold drawn steel rails provide extremely durable protection to the slab arrises, making it ideal for floors in a heavy duty traffic environment.

The system ensures reliable load transfer in formed free movement joints with openings of up to 20 mm wide, and suitable for slab depths from 100 mm to 300 mm.

Available in Plain Steel, Hot Dip Galvanized finish or Stainless-Steel versions, which means that the TERAJOINT® system offers a solution for all operational environments.

The TERAJOINT® system range includes a selection of prefabricated intersections, including "T" sections, "X" sections and rounded sections.
