

TERAJOINT® Free Movement Joints

Robust Free Movement Joint Systems

- Prefabricated leave-in-place free movement joint system with a variety of fixed load transfer mechanisms to suit various floor loadings.
- Excellent performance with 40 mm × 10 mm cold drawn steel for strong armoring of joint arrises.
- Suitable for the high flatness category floor and superflat floor construction.
- Fast track installation with a selection of fixing methods and accessories.
- All materials used in this product are 100% recyclable.

TERAJOINT® is the industry standard in the range of prefabricated heavy-duty movement joint systems, suitable for all large-area construction methods for ground-bearing and pile-supported concrete floors. The cold-drawn steel top strips provide durable protection to the slab arrises, making it ideal for floors in a heavy-duty traffic environment.

The system ensures reliable load transfer in formed free movement joints with openings of up to 30 mm wide and is suitable for slab depths from 100 mm to 300 mm. Custom-made items for application in slabs over 300 mm thick can be produced upon request.

Available in Plain Steel, Hot Dip Galvanized finish, or Stainless Steel versions, which means that the TERAJOINT® system offers a solution for all operational environments.

The TERAJOINT® system range includes a selection of prefabricated intersections, including “T” sections, “X” sections, and rounded “R” sections.
