

TWIN CORBEL

for slabs and secondary beams with topping concrete

TWICE AS GOOD.

- **Easy to fit into TT slab web**
- **Wide support area – less point loads**
- **Supplementary reinforcement according to loads**

EFFICIENT SUPPORT FOR TT SLABS AND SECONDARY BEAMS

Peikko TWIN Corbel is a support corbel for TT slab, secondary beams and ribbed slab structures with topping concrete.

- + Enables secure installation and simple erection
- + Only necessary amount of reinforcement is used as supplementary reinforcement is designed according to loads
- + three different models cover loading up to 145 kN / corbel

Peikko's TWIN Corbel has DiBt type approval.
