

WAVEJOINT® Free Movement Joint

Silent and Robust Free Movement Joint System

- WAVEJOINT® is specially designed for smooth and silent transition across the joints
- Prefabricated leave-in-place free movement joint system with a variety of fixed load transfer mechanisms to suit all floor loadings.
- Excellent performance with 40mm x 6mm wavy steel flat bars for extreme armoring of joint arrises.
- Suitable for the high flatness category floor and superflat floor construction.
- Fast track installation with a selection of fixing methods and accessories.
- Compatible with TERAJOINT® regarding slab thicknesses and loads.
- All materials used in this product are 100% recyclable.

WAVEJOINT® is prefabricated heavy-duty movement joint systems, suitable for all large area construction methods for ground and pile supported (or ground-bearing and pile-supported) concrete floors. The wavy steel rails provide extremely durable protection to the slab arrises with silent crossing of joint, making it ideal for floors with highly intensive traffic environment.

The system ensures reliable load transfer in formed free movement joints with openings of up to 30 mm wide, and suitable for slab depths from 100 mm to 300 mm.
